**Being a dog owner is one of the most rewarding and joyful experiences we can have, but do you truly know how to protect your four legged family member, or how to respond if they had an accident, were taken ill or needed CPR?**

This course covers the essentials that all dog owners should know, including:

- Administering first aid and the legal and ethical restrictions of doing so.
- Planning for a canine first aid emergency.
- Keeping the first aider safe and dealing with (and handling) an injured dog.
- Checking key vital signs (respiration, pulse, temperature, mucous membranes).
- Signs and treatment of: shock, choking, open wounds, strains and sprains.
- Discussion of other common conditions and possible treatments.
- Hyperthermia, hypothermia, and gastric torsion / bloat.
- A dog's needs, symptoms of illness and responsibilities of dog ownership.
- Preventative measures Inc: health monitoring, conditioning, and insurance.
- Lifesaving Canine CPR training.

**Taught using powerful presentations and video clips, practical hands on exercises (including bandaging), and use of the latest in dog CPR training with Casper the CPR training aid, you can practice giving CPR to a dog.**

Taught by a fully qualified and insured instructor, who has years of experience working with dogs both professionally in practice as originally a Canine Hydrotherapist for Service Dogs, and latterly a Veterinary Pharmacist and DEFRA Suitably Qualified Person To Prescribe & Supply Veterinary Medication. In his personal life Gary is a Kennel Club Accredited Instructor (Non-Competition Agility), was for 10 years an Assistant Group Steward at Crufts Dog Show, and was Head of Canine Sports at the National Lottery Funded Canine Sports Academy. He brings this wealth of practical dog experience and dealing with Dog First Aid incidents to really bring the Dog First Aid Course to life, with interesting real life examples.
